

Grade 10 Enrichment Tour 2024

In recent years, Stanford Lake College has organised various tours for our Grade 10 learners, offering them unique opportunities for personal and educational growth. These tours have included a History excursion to KwaZulu-Natal, a trip to Gauteng, and a memorable journey to Zimbabwe. While these trips have undoubtedly provided our students with enjoyable experiences, we believe in fostering deeper learning and enrichment beyond just having a good time.

In 2024, the Grade 10 students will embark on an Enrichment Tour, aligning with the Round Square Exchange programme. The excursion is scheduled for the fourth term and all students not participating in the international exchange programme will join the Enrichment Tour.

Date: 19-28 November 2024. The experience will take place in the vicinity of the Strijdom Tunnel – a location that may remind them of their first Grade 9 expedition, had the river not been too high to complete it. Adventure will remain an integral part of this trip, and the skills and experiences gained during their time in the outdoor adventure lessons will undoubtedly come in handy. We kindly request that you do not dispose of or pack away your adventure gear, as it will be put to good use during this trip. The students will receive more information about this tour in the third term so that they can start with their planning as well as cross curricular exercises.

The approximate cost per student for this Enrichment Tour will be around R4500, with the school subsidising the remaining expenses. We are genuinely excited about this upcoming adventure and the substantial value it will bring to their overall educational journey.

We look forward to this enriching experience and the growth it will bring to our students' lives.

Adventure greetings

Neil Haarhoff

Director of Outdoor Education
